Launch of Academic Helpline

Dear Member,

Greetings from ICSI!

I am happy to inform you that recently, we have taken various initiatives to ensure best and quality services to its students and members.

To know about the quality of services being provided by the Institute to the students, the Institute invites feedback from the industry and other stakeholders at regular intervals. Since, a number of students of ICSI come from far flung areas of the country who need various information to clear their doubts on subject matters from the Institute on real-time basis.

It gives me immense pleasure and satisfaction to inform you that to provide real-time response to the queries of the students, the Institute has launched the 'Academic Helpline' today. This Academic Helpline shall have a pool of faculty resources to cater to the queries of students.

On the occasion of the launch of the Academic Helpline by the hands of Shri Suresh Prabhu, Hon'ble Minister of Railways, Government of India, he lauded the novel initiative of the Institute and hoped that the students of the Institute across the country shall immensely benefit from the proposed Academic Helpline. During the launch, I assured the Hon'ble Minister that the Institute shall be utilising the expertise of its senior Members to work as Mentors for the next generation of professionals.

This is one of the projects of the Institute for which the best of the faculty across the country have been empanelled to guide the students on various subjects. The Academic Helpline will become a boon for the student fraternity as the Helpline will open at 7 AM in the morning and continue to work till 11 PM of night. The extended hours will help our students to get guidance at their convenient time.

I dedicate this service to our stakeholders and request you for dissemination of the initiative with your trainees/students and look forward to your whole-hearted co-operation in strengthening the services to be provided through Academic Helpline.

Regards,

CS (Dr.) Shyam Agrawal
President, The ICSI
