

KNOWLEDGE ON DEMAND

A profession cannot maintain its cutting edge competencies unless its members regularly update their knowledge. In the current business environment, legislative and technological developments are taking place at a faster pace than ever before. Knowledge updation and skill augmentation for the professionals is of utmost importance.

The Institute constantly endeavours to facilitate the members in keeping them abreast of latest developments, widening their knowledge base and improving their skills to maintain the cutting edge by providing training and expertise in critical areas of professional interest and to assist members in enhancing their competencies by acquiring requisite skills commensurate with their professional responsibilities through various programs/ webinars, etc.

Knowledge on Demand is an initiative of the Institute providing facility to members to explore the recorded sessions & PPTs (if available), on important topics delivered by subject experts, as per their requirement and update their knowledge at their convenience 24x7 online on the LMS Platform of the Institute. It is an endeavour to provide access to the repository of videos available with the Institute to facilitate the members in knowledge and skills updation.

Disclaimer:

The videos available under Knowledge on Demand programme are recorded sessions of the PMQ, Certificate and Crash Courses of the Institute held earlier. There may be certain changes in the content delivered through the videos/PPTs due to legislative and regulatory developments.

Anyone willing to act on the basis of the videos/PPTs should do so after cross checking with the original source. The Institute shall not be responsible for any loss or damage, resulting from any action taken on the basis of the contents of the videos/PPTs.
