Competition Law in India continues to be one of the most important economic and business legislations aimed at curbing anti-competitive activities and ensuring a framework of fair market play. The increasing impact of the laws on the economy and business continues to be acknowledged by way of synchronization and integration of compliance with the law within the overall corporate processes. CII has been working with the Government of India and Competition Commission of India (CCI) in continuous evaluation of existing rules and regulations by suggesting suitable changes in the Competition Law regime of the country. CII appreciates the Government’s efforts of reviewing the Law (including the functioning of the Competition Act, 2002 (Act) and the allied rules and regulations) in light of the changing business environment. The Competition Law Review Committee constituted by the MCA has also recently submitted its Report to the Government and is intended to further streamline the law. In keeping with the latest developments in the anti-trust regime, the CCI is also working on the e-Commerce market in India which focuses on the overall ecosystem; shifts in strategies; competition landscape and issues therein.

Against this background, CII is organizing an Annual Roadshow on Competition Law and Practice. Discussions at the Conference would be aimed to enable direct regulator-industry dialogue while providing a platform for understanding the next steps with respect to challenges of the competition regime. The Roadshow will also discuss Agreements, Cartels and Leniency; Merger Control Compliance and Competition Culture; and the tech e-Commerce boom, new age markets and big data in the current competition scenario.

Note: Prior registration is mandatory. CII reserves the right to confirm participation.

SATURDAY 30 NOVEMBER 2019 | MUMBAI
