A SCOPE-ICSI Program

Background

“ponder and deliberate before you make a move”

Sun Tzu

Deliberation is the collaborative process of discussing contested issues by considering various perspectives in order to form opinions. Deliberations become very significant when we have to implement the newly inserted provisions which involve discussions on nitty-gritties of the key change or new provision. It brings clarity and harmony in interpretation of the provisions which in turn leads to better implementation.

The topics for deliberations for the training programme are very apt as these involve discussions on the key amendments under the Companies Act, 2013. Best Boardroom Practices are seen as Good Governance Practices. Experts from industry would share their experience on such practices for the adoption by participating PSUs. Further, without technology, the organisation would not be able to keep pace with their counterparts. To understand its role in the organisation while implementing the key provisions of law would be an interesting area. Then, discussions on challenges always lead to resolutions. With this expectation, the deliberations on the topic are planned.

Key Takeaways from the Programme

- Understanding the recent key developments under the Companies Act, 2013
- Deliberations on Best Boardroom Practices as good corporate governance practice
- How technology can be used for various corporate practices by PSUs such as meetings, board evaluations etc.
 - The Companies Act, 2013
 - SEBI Regulations, 2015
- A deliberation and discussion on the key challenges faced and the resolution for PSUs while implementation of laws
