Mr. R.R. Rashmi

Former IAS &

Distinguished Fellow, Green Shipping, TERI

Climate Governance: SDGs, Challenges & Solutions

Climate governance is essential to ensure sustainable development, mitigate climate change impacts, and achieve sustainable development goals. Climate governance acts as a cross-cutting enabler for all SDGs by fostering climate-resilient development. The challenge of climate change calls upon us to draw upon the wisdom of the past, integrating traditional knowledge with scientific advancements to forge a path towards a more sustainable and resilient future. By embracing climate governance, organizations and individuals can contribute to a healthier planet and a more sustainable future for all. This proactive approach not only mitigates risks but also unlocks opportunities for innovation and economic growth in a low-carbon world.

The Session will focus on the concept of Climate Change Governance and associated challenges in the light of SDGs, Net Zero Targets and Nationally Determined Contributions (NDCs).
