PART – A

(Answer Question No.1 which is compulsory and ANY THREE of the rest from this part.)

1. (a) State whether the following statements are true or false citing relevant provisions of the law and the case law, if any :
- (i) Organic growth is the rate of growth of business by increasing output and business reach, by acquiring new business by way of mergers, acquisitions, takeovers or other restructuring strategies.
 - (ii) In the case of an 'amalgamation in the nature of purchase', the balance in the statement of profit and loss appearing in the financial statements of the transferor company is aggregated with the corresponding balance appearing in the financial statements of the transferee company. Alternatively, it is transferred to the general reserve, if any.
 - (iii) Where the scheme has been approved by the holders of not less than nine/tenth (90%) in value of shares of the transferee company, the transferee company may give notice to any dissenting shareholder that it desires to acquire the shares. The scheme shall be binding on all the shareholders of the transferor company (including dissenting shareholders), unless the court orders otherwise.
 - (iv) Any person who holds 5% or more of the shares or voting rights of a target company and who acquires or sells shares representing 2% or more of the voting rights, shall disclose details of such acquisition/sale to the target company at its

registered office and to every stock exchange where the shares of the target company are listed within 2 working days of such transaction, as per the format specified by SEBI.

- (v) Reduction of share capital results in extinguishment of class of shares.

(2 marks each)

- (b) The total capital deployed by Aquawater Urja Ltd. is ₹50 crore for 5 MW hydro power project. During last five years, on an average, the company has earned profit of ₹12 crore and has outsmarted hydro industry average of 20% profitability. As per the technical experts, in all likelihood, the company would be able to maintain its profitability trend for remaining life of the project. Calculate the valuation of the company on the basis of super profits method.

(5 marks)
